

# A world without ERP software

ERP software, a tool that can add efficiency and agility to businesses irrespective of their size, has now augmented to be a necessity for business leaders, who seek a leading edge in the cutthroat market today. However, what if the essential business management tool decided to just vanish from our world?

**Doomsday, a day without ERP software.  
Digging into the issues faced and struggling to survive**

**Time 9:30AM**  
Employee attendance and time tracking

Inconsistency in data entry.

Probability for errors and miskeying information.

System is dependent upon precision of a single individual.

Lack of record security.

**Time 9:40 AM**  
Process Planning and Task assignment

Prone to errors and miscalculation

Final reporting relies (variably) upon the capability of the project manager

High time consumption while evaluating and compiling reports

Further possible delay as the supervisors manage available resources

**Time: 12:00 AM**  
Inspection, Troubleshooting & Lunch (of course)

Manually tracking of all the processes in action

Complexity faced while troubleshooting for errors

Assigning & re-assigning task to staff & labours

Food (of course), need energy to survive the day!!

**Time 4:00 PM**  
Inventory management & distribution planning

Getting appropriate batch codes for future tracking.

Keeping a track of already dispatched products

Faulty data entry may lead to: tardy deliveries, expired products, over stocking.

Insecure and unreliable delivery and acknowledgment

**Time 6:00**  
Finance and HR management

Every single digit matters, a need for top-notch precision sounds legit.

Keeping up with previous and upcoming compliances.

Chances of dubious purchase orders and unreliable employee performance charts.

Tracking employee work performance for promotions and bonus.

## Gosh!! did the day end?

No wonder, ERP software has become a lifeline of the businesses today. And judging by the need for its efficiency, it's far from vanishing in many years to come, *so stay calm and keep planning with the proficient and smart ERP software.*
